PROFILE

Dynamic and results-driven professional with over 4 years of full-stack development experience. With my excellent leadership and problem-solving abilities, I'm dedicated to achieving success and going above and beyond in every endeavor I create.

WORK EXPERIENCE

Questnova Systems Corporation

Fullstack Developer - Project Based

2026 FEB - PRESENT

- Led a team of 5 developers in a fast-paced Agile environment, driving end-to-end development of scalable web responsive applications that improved delivery efficiency and ensured on-time release of high-quality features.
- Collaborated with cross-functional teams to transform business requirements into responsive, user-focused solutions, enhancing application performance, maintainability, and overall user experience across multiple platforms.
- Architected and implemented scalable frontend and fullstack solutions using modern technologies, while enforcing code quality, security, and best practices that reduced development bottlenecks and accelerated feature delivery.
- Mentored and guided jr. developers through code reviews, technical problem-solving, and workflow optimization, resulting in improved team productivity, faster onboarding, and more consistent development standards.
- Designed and integrated RESTful APIs and backend services using Node.js and Express.js, supporting secure data exchange, authentication workflows, and scalable internal system integrations.
- Streamlined development workflows and Agile processes by improving collaboration, task prioritization, and deployment practices, enabling the team to adapt quickly to evolving project requirements and tight delivery timelines.

Innosoft Solutions Inc.

Full Stack Developer - Full Time

2023 JUL- 2026 FEB

- Developed and maintained responsive, cross-platform applications using React.js, Tailwind CSS, and component-based architecture, delivering improved user experience, faster interface responsiveness, and efficient real-time data visualization.
- Spearheaded frontend development for a desktop analytics application used in mall accreditation workflows, creating dynamic dashboards, validation processes, and multi-format file handling (CSV, XML, XLS) that streamlined operational reporting and data processing.
- Collaborated closely with cross-functional teams in an Agile environment to deliver maintainable, production-ready applications with comprehensive unit and integration testing using Jest, improving application reliability and reducing regression issues.
- Built and maintained reusable component libraries and responsive design systems, ensuring UI consistency, faster feature development, and optimized experiences across desktop, web, and mobile platforms.
- Optimized frontend performance and usability by implementing clean architecture patterns, reusable logic, and scalable state management practices, contributing to faster development cycles and long-term maintainability.

Innosoft Solutions Inc.

Software Developer - Internship

2023 FEB - MAY

- Assisted in ERP module implementation and customization, helping streamline business operations and improve workflow efficiency for client organizations.
- Supported and maintained legacy applications by troubleshooting issues, implementing fixes, and optimizing existing functionalities to ensure system stability and continuous business operations.
- Configured and managed automated database backup solutions for clients, improving data security, recovery readiness, and overall system reliability.
- Handled data migration, transformation, and system integration processes, ensuring accurate and seamless transfer of business data between legacy and modern platforms.

Rococo

Software Developer - Remote Internership

2023 JAN - APR

- Designed and developed custom applications, workflows, and modules on the ServiceNow platform, improving process automation and enhancing operational efficiency for internal business functions.
- Configured and maintained Service Catalog solutions, including catalog items, request forms, and automated workflows, streamlining service request management and improving user experience.
- Managed data import, transformation, and migration processes using Import Sets, Transform Maps, and Data Sources, ensuring accurate and reliable integration of business data into the ServiceNow platform.

EDUCATION

Bachelor of Science in Information Technology (BSIT)

University of Cebu

SKILLS

Soft Skills

- Project Management & Leadership
 - Effective Communication
 - Critical Thinking
- Adaptability
 - Time Management
 - Collaboration

Technical Skills

Frontend & Multiplatform Development

- React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, React Native, Electron JS
- Responsive and cross-platform UI development using React Router, Redux, React Query, and component-based architecture, building scalable web and multiplatform applications with React, Expo (React Native)

UI Frameworks & Styling

- Tailwind CSS, Material UI (MUI), Bootstrap, ShadCN UI, styled-components
- Strong understanding of responsive design, reusable component systems, and modern frontend styling practices

Backend & API Integration

- Node.js, Express.js, NestJS
- RESTful API integration and third-party service connectivity
- Auth and session management using Auth.js and JWT

Testing & Development Tools

- Jest, Vitest, React Dev Tools

Databases & Cloud Services

- Microsoft SQL Server, MongoDB, MySQL, PostgreSQL, Redis
- ORM tools: Prisma, TypeORM
- Cloud platforms: AWS, GCP, DigitalOcean

DevOps & Deployment

- Docker, CI/CD workflows
- Deployment platforms: Vercel, Replit, Drone
- Version control using Git

API & Integrations

- Postman, Swagger/OpenAPI
- Payment and third-party integrations including Stripe and Google Pay, PayMaya

Collaboration & Design Tools

- Jira, ClickUp, Kanban, Figma, Canva
- Agile/Scrum collaboration and UI/UX coordination
